

WEBTECHNOLOGY: Assignment 2

My website is a charitable online purchase system for the GrowFuture Foundation. The users can choose products, add them to a shopping cart, enter their buyer and shipping information, and receive a purchase summary. It includes a discount of purchasing more than 3 items. The money will go to projects and services to improve greenspaces, to resolve the destruction of nature.

Our Mission

*Our mission at **GrowFuture Foundation** is to support nature by planting seeds in community spaces. Pollution and global warming are increasingly harming our environment, and without proper care for plants and local wildlife, future generations will suffer the consequences of today's neglect. We work to strengthen biodiversity in parks, schools, and public gardens by encouraging sustainable planting and environmental awareness. By purchasing our high-quality, beginner-friendly, and eco-friendly products, YOU become part of our mission to support plant growth, bees, butterflies, and local wildlife. **Every purchase helps fund local environmental and nature projects**, allowing us to protect green spaces and further expand the growth and conservation of our natural environment."*

What are YOU waiting for? Come grow with US!

[Home](#) [Mission](#) [Shop](#)

- **Navigation:** I used **Bootstrap** (NavBar) for my main and footer navigation. It also collapses for responsive design into a hamburger menu on smaller screen sizes
- **12x Cards:** I used **Bootstrap** Cards to display my 12 items in the gallery which includes (image, name, description, price and a button)
- **Buttons:** The “Add to Cart”, “Reset Cart”, “Checkout” and “Back to Top” with **Bootstrap**
- **Badges:** I used **Bootstrap** Badges to display number of items in the cart and total price
- **JavaScript:** The cart is an array is used to store shopping cart items. When the user clicks any “Add to Cart” button, the product name and price are added to the cart array. I also included the cart count and total price at the top. When the user clicks the checkout button, the shopping section is hidden and the buyer information form is displayed.

Buyer & Shipping Information

Buyer Information

Firstname:	Surname:
<input type="text" value="Enter your firstname..."/>	<input type="text" value="Enter your surname..."/>
Email address:	Phone number:
<input type="text" value="Enter your email-address..."/>	<input type="text" value="Enter your phone number..."/>

Shipping Address

Street Address:	House Number:
<input type="text" value="Enter your street address..."/>	<input type="text" value="Enter your house number..."/>
City:	ZIP/Postal code:
<input type="text" value="Enter your city..."/>	<input type="text" value="Enter your ZIP/Postal code..."/>
State/Region:	Country:

- **Form:** For the Buyer and Shipping information, I used **Bootstrap** form
- **Validation:** in HTML I used “required” for the fields and the “type” for example for email input. I used maxlength for the ZIP code which is 6. However for phone number I used JavaScript validation which ensures that the phone number contains only digits. (If invalid, an alert pops-up to inform user that it must include digits only.
- **“Place Order Button”:** The button will then continue if valid and will hide the buyer/shipping section to the confirmation section.

Thank you for your Purchase!

Your purchase will fund our projects that **protect native plants** and **support local wildlife** in our community.

Now **YOU** also play a part in the collective effort to grow a green future and homes for local wildlife.
